

Defense Logistics Management System (DLMS) Introductory Training

DLMS Training Catalog

- Module 1 - Introduction to the DLMS**
- Module 2 - Electronic Data Interchange (EDI) Basics and ASC X12 EDI Definitions and Concepts**
- Module 3 - DLMS Functionality & Transaction Life-Cycle**
- Module 4 - DLMS Transaction Supplement Content**
- Module 4F - DLMS Functional Financial Transaction Life-Cycle**
- Module 5 - IUID & RFID - Emerging Technologies**
- Module 6 - Creating/Reengineering DOD Logistics Business Processes**
- Module 6A - DLMS Configuration Management (stand alone Module)**
- Module 7 - Enterprise Interoperability Tools**
- Module 8 - DoD Activity Address Directory (DoDAAD)**

Module

Module Structure I - Transaction Supplement Content

- **Federal Implementation Conventions (ICs)**
- **DLMS Supplements to the Federal ICs**
- **Inherent X12 EDI Enhancements**
- **Criticality of DLMS Notes**
- **DLSS/DLMS Mapping**
- **DLMS Supplement to the Federal**

Module 4

Objectives

Students will gain basic understanding of:

- **The purpose and content of the Federal ICs used in the DLMS**
- **How DLMS Supplements are used to support DLMS implementation**
- **Criticality of DLMS Notes**
- **How to use DLSS/DLMS mapping**
- **How to read a DLMS Supplement**

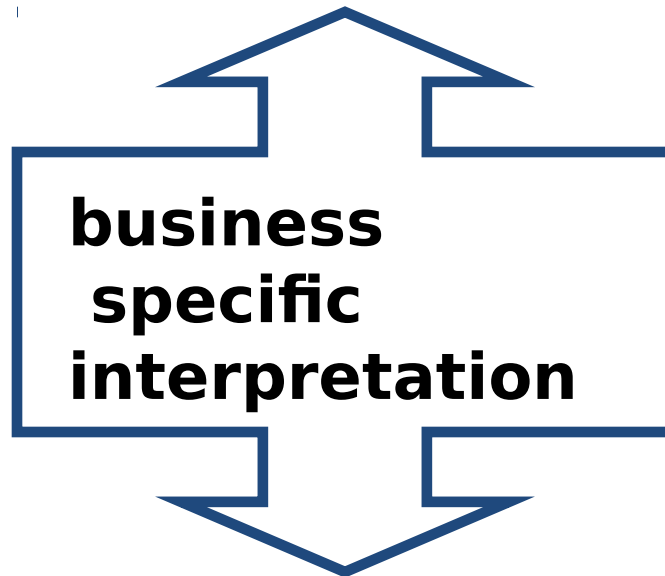

Federal Implementation Conventions

Hierarchy of Relationship

ASC X12 Transaction Set

Federally Approved IC

Approved ICs

- **All DLMS EDI implementation Conventions are Federally Approved**
 - ✓ Define the structure and content of an ASC X12 EDI standard transaction as it pertains to a particular usage
 - ✓ Map application data requirements into specific data fields within the transaction set
 - ✓ Establish the parameters for the corresponding DLMS Supplement

Functionality

- **Federal ICs supporting DLMS reflect functionality derived from multiple sources**
 - ✓ DLSS (or MILS) as currently implemented
 - ✓ Approved changes with full Component implementation pending (due to lack of resources & competing priorities)
 - ✓ Enhanced capabilities
 - ASC X12 standards-based enhancements
 - DLSS/DLMS approved changes

ASC X12

Standards-Based Enhancements

- 8 digit dates throughout
- Multiple transactions
- Longer data elements:
quantities, reference and
identification numbers
- Repeating data elements
- Transmission date/time

ASC X12

Standards-Based Enhancements

- **Flexible addressing**
 - ✓ Clear text addressing
 - ✓ Codified addressing capability expanded:
 - DoDAAC, RIC, CAGE, DUNS, DUNS+4, MAPAC
- **Full line of accounting as discrete data**

General Enhancements

(included in most transactions)

- **Point of contact information**
- **Expanded material identification:
national stock numbered material,
ammunition, forms, publications,
subsistence, preferred and substitute
NSNs, part number, description**

General Enhancements

(included in most transactions)

- **Unique item tracking capability**
 - ✓ Unique item identifier (e.g. IUID UII Constructs 1 and 2, VIN, etc.)
 - ✓ Batch number
 - ✓ Lot number
 - ✓ Serial Number
- **Document number added to provide unique transaction identification**

General Enhancements

(included in most transactions)

- **Break-out of embedded data**
 - ✓ Utilization Code (expressed in document number)
 - ✓ Security Assistance data
 - ✓ Required Delivery Date/Special Requirements Code
- **Reduction/elimination of multi-purpose data fields**
 - ✓ Ownership/Purpose Codes

DLMS Supplements Supporting Use of Federal ICs

Hierarchy of Relationship

ASC X12 Transaction Set

Federally Approved IC

**DLMS
specific
business
rules**

DLMS Supplement

DLMS Supplements

- **DLMS supplements (along with the DLMS manual) constitute DoD's trading partner agreement for use of the Federal ICs within the DoD logistics process**
- **DLMS supplements incorporate detailed information which would fall outside the scope of Federal ICs - - but which is necessary for a successful, coordinated implementation**

Content of DLMS Supplements

The DLMS Supplements mirror the approved Federal ICs and include:

- Federal IC notes (as applicable)
- DLMS notes: Detailed DLMS business rules - the Supplements accept or prohibit options and often add conditions to the use of optional data within DoD logistics
- Key transition guidance governing operation in a mixed DLSS/DLMS environment

Transition Guidance

- **Identification and instructions pertaining to:**
 - ✓ DLMS enhancements
 - ✓ Approved changes pending full implementation
 - ✓ Field size constraints
 - ✓ “Streamlined” DLSS data required for legacy system support, but not intended for use in full DLMS environment

Streamlining

Goals

- **Reduce retransmission of data perpetuated from previously submitted transactions**
 - ✓ Already resident in sender's and receiver's system Example: Original (non-mandatory) requisition data may be streamlined out of follow-up transactions
- **Reduce encoded data content where transaction size constraint was the sole reason for encoding**
 - ✓ DLMS offers capability to communicate more fully or more precisely

DLMS Supplement Notes

- **DLMS Business Rules**
- **DLMS Enhancements**
- **Field Size Constraints**
- **Streamlined Data**
- **Approved DLMS Changes**

Example 1 - DLMS Business Rules

Rules

Notes delineate appropriate functional application for a particular transaction

940R - Warehouse Shipping Order (Material Release)

940R - Warehouse Shipping Order (Material Release)

DoD 4000.25M

940 Warehouse Shipping Order Federal IC

Functional Group ID=OW

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Shipping Order Transaction Set (940) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to enable the depositor to advise a warehouse to make a shipment, confirm a shipment, or modify or cancel a previously transmitted shipping order.

Notes:

Use a single occurrence of this transaction set to exchange single or multiple transactions between a single organization and a single or multiple organization.

Heading:

Page No.	Pos. No.	Seg. ID	Name	Req. Des.	Max. Use	Loop Repeat	Notes and Comments
4	0100	ST	Transaction Set Header	M	1		
5	0200	W05	Shipping Order Identification	M	1

Not Used	0800	PER	Administrative Communications Contact	O	5		

940 Warehouse Shipping Order DLMS Supplement

Functional Group ID=OW

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Shipping Order Transaction Set (940) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to enable the depositor to advise a warehouse to make a shipment, confirm a shipment, or modify or cancel a previously transmitted shipping order.

Notes:

Federal Note: Use a single occurrence of this transaction set to exchange single or multiple transactions between a single organization and a single or multiple organization.

DLMS Note: 1. ICPs or IMMS use this transaction set to direct storage facility shipments, to reposition inventory between storage facilities, to transmit lateral redistribution orders under Total Asset Visibility (TAV) procedures, to inquire about the status of open shipment directives, to cancel and modify previously submitted shipment directives, and to advise that open shipment directives will be administratively (force) closed. The Defense Reutilization and Marketing Service (DRMS) uses this transaction set to inquire about discrepancies in either shipments to or receipts at a Defense Reutilization and Marketing Office (DRMO).

2. The Department of Defense (DoD) distinguishes among redistribution orders; material release orders, inquiries, cancellations, and modifications; disposal release orders, inquiries, cancellations, modifications, and shipment confirmation inquiries; historical material release orders; historical disposal release orders; and material release order forced closures.

3. Users operating under the Defense Logistics Management System (DLMS) must reference the Unit of

Example 2 - DLMS Enhancement

- **Data associated with a DLMS enhancement may not be received or understood by the recipient's automated processing system**
- **DLMS procedures may not have been developed**
- **Components must coordinate requirements and business rules with DLMS office prior to use**

DLMS Supplement

92

Reason for Disposal Code

DLMS Note: 1. Use in disposal release orders and historical disposal release orders, to identify the reason the disposal action is required.

2. DLMS enhancement; see DLMS introductory note 4a.

Example 3 - Field Size Constraints

- **Data elements which have an expanded field size above existing DLSS capability may not be supported by the recipient's automated processing system**
- **Components must coordinate implementation with DLMS office prior to use**

DLMS supplement

	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
M	W0101	330	Quantity Ordered	M R 1/15

Quantity ordered

Federal Note: Use to identify the material quantity associated with the transaction.

DLMS Note: A field size exceeding 5 positions may not be received or understood by the recipient's automated processing system. See introductory DLMS note 4d.

Example 4 - Streamlined Data

- DLSS data is retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/ DLMS environment
- This data will be “streamlined” out once full DLMS implementation is reached
- Components may coordinate with DLMS office for early termination (or retention) of specific data requirements for users operating in a full DLMS environment

DLMS Supplement

DLMS Note: Future streamlined data; see introductory DLMS note 3c.

Example 5 - Approved Change

- **Data associated with an Approved Change may not have an established implementation date.**
- **This data may not be received or understood by the recipient's automated processing system.**
- **Components must coordinate implementation with DLMS office prior to use.**

ZZ Mutually Defined

DLMS Note:

1. Use to identify the Unit of Use Indicator. When included, the quantity and unit of measure values associated with this transaction are applicable to the unit of use.
2. Authorized DLMS enhancement under DLA industrial activity support agreement. Refer to ADC 381.
3. Authorized DLMS enhancement for DLA Disposition Services. Refer to ADC 457.

Example 6 - Repetition of Data

- Repetition of data is not compatible with existing DLSS/DLMS capability.
- This data may not be supported by the recipient's automated processing system.
- Components must coordinate implementation with DLMS office prior to use.

DLMS Supplement

5. This DLMS Supplement (DS) to the Federal 527R implementation convention contains:

a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DLA Logistics Management Standards prior to use.

b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DLA Logistics Management Standards prior to use.

c. Data which is retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DLA Logistics Management Standards for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.

d. Data elements which have an expanded field size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DLA Logistics Management Standards prior to use.

e. Data required to accommodate Component-unique transaction requirements (e.g., C-series transactions). Data does not apply to DLSS transactions.

f. Repetition of data (using multiple iterations or loops) which is not compatible with existing DLSS capability. Although supported by the use of the ANSI X12 standard, such data is not compatible with DLSS/DLMS conversion and may not be supported by the recipient's automated processing system. Components must coordinate implementation of enhanced capability with DLA Logistics Management Standards prior to use.

Example 7 - Authorized Enhancement

- Data associated with an Authorized Enhancement should be included as part of the modernization when applicable.
- Inclusion of this data should not cause an inappropriate rejection of the transaction.
- Prior coordination with DLMS office is not required prior to use.

DLMS Supplement

Description: Code qualifying the Reference

Identification
field will note by any code.

DLMS Note: For DLMS use, only the following codes are authorized.

Code Name

BT Batch Number

DLMS Note:

1. Use to identify the batch, lot, or production run. The batch/lot number may not exceed 20 characters in accordance with UID policy.
2. Use 'BT' in 2/REF/250 when U11 or serial number does not apply for the item. When U11 or serial number is required in addition to batch/lot number, enter the U11 or serial number in 2/REF/250 and enter the batch/lot number in 2/N9/270.

SE Serial Number

DLMS Note:

1. Use to identify the serial number (when code U3 is not used). Use this qualifier for unique item tracking based upon the serial number.
2. DLMS enhancement. See introductory DLMS note 4a.

U3 Unique Supplier Identification Number (USIN)

DLMS Note:

1. Use to identify the U11. Place U11 value in REF03. The U11 may not exceed 50 characters in accordance with UID Policy. An ANSI data maintenance was approved in version 5020. The approved code/name is "U11-Unique Item Identifier".
2. Authorized DLMS migration enhancement. See DLMS introductory note 4g.

DLSS/DLMS Mapping

DLSS/DLMS Conversion

DAAS implements program logic to accommodate conversion between DLSS and DLMS

Identifies data content and location within DLSS and DLMS formats

Reflects conditional data which impact data content and location

The DLSS Fixed Format Requisition

511 Requisition

Functional Group=RN

This Draft Standard for Trial Use contains the format and establishes the data contents of the Requisition Transaction Set (511) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to requisition needed material and equipment from a supply distribution system for immediate consumption or stockage against projected requirements. The originator can also use this transaction set to inquire about the status of, amend, or terminate the original requisition. This transaction set may be used to convey a description and quantity of the required material, delivery and billing information, and other logistics information necessary to evaluate and meet the material needs of the originator. This transaction set is not used to establish a contractual relationship between trading partners, and may precede the use of a purchase order.

Notes:

1/50L	The LM loop identifies logistic data common to the entire transaction set.
1/50	The LM loop identifies logistic data common to the entire transaction set.
1/70L	The N1 loop identifies name and or address information common to the entire transaction set.
1/70	The N1 loop identifies name and or address information common to the entire transaction set.
2/150L	Each iteration of the QTY loop qualifies a portion of the total quantity ordered with particular logistics information codes.
2/150	Each iteration of the QTY loop qualifies a portion of the total quantity ordered with particular logistics information codes.
2/180L	The N1 loop identifies the name and address information unique to each use of the LX loop.
2/180	The N1 loop identifies the name and address information unique to each use of the LX loop.
2/220L	The REF loop conveys serial and lot number inventory data.
2/220	The REF loop conveys serial and lot number inventory data.

Federal Note:

1. Organizations use this transaction set to order items of supply, to refer transactions to another supply source for processing, and to transmit misrouted transactions between supply sources.
2. Use a single occurrence of this transaction set to transmit single or multiple requisitions to one or more supply sources.
3. A single transaction set may contain a combination of requisitions for standard and nonstandard material.
4. DoD logistics users should refer to the Defense Logistics Management System (DLMS) Supplement to the Federal Implementation Convention (IC) available at URL: <http://www.dla.mil/j-6/dlms>. The DLMS Supplement provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

DLMS Note:

1. Requisitions for material to be provided as Government Furnished Material (GFM) to commercial contractors, requisitions for excess government owned plant property, and requisitions from foreign governments for material to be provided in support of Security Assistance (SA) contain distinguishing requirements which do not apply to non-GFM or non-SA requisitions.
2. Users operating under the Defense Logistics Management System (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table, Transportation Mode of Shipment Conversion Table, and the Accounting Classification Appendix which can be found on the Defense Logistics Management Standards Office (DLMSO) web site at www.dla.mil/j-6/dlms.
3. This DLMS Supplement to the Federal 511R implementation convention contains:
 - a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DLMSO prior to use.
 - b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - c. Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DLMSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.
 - d. Data elements which have an expanded field size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - e. Data required to accommodate Component-unique transaction requirements (example: C-series transactions). Data does not apply to DLSS transactions.
4. This revision to the DLMS Supplement (DS) incorporates Approved DLMS Changes (ADCs) listed. ADCs are available from the DLMSO website: <http://www.dla.mil/j-6/dlms/Changes>
 - ADC 45, Use of Both Ownership Code and Purpose Code in DLMS for Ammunition
 - ADC 59, Customer Identification on Automated Exception Requisitions

- DLMS Note:**
1. Requisitions for material to be provided as Government Furnished Material (GFM) to commercial contractors, requisitions for excess government owned plant property, and requisitions from foreign governments for material to be provided in support of Security Assistance (SA) contain distinguishing requirements which do not apply to non-GFM or non-SA requisitions.
 2. Users operating under the Defense Logistics Management System (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table, Transportation Mode of Shipment Conversion Table, and the Accounting Classification Appendix which can be found on the Defense Logistics Management Standards Office (DLMSO) web site at www.dia.mil/g6/dlms.
 3. This DLMS Supplement to the Federal 511R implementation convention contains:
 - a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DLMSO prior to use.
 - b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - c. Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DLMSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.
 - d. Data elements which have an expanded field size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - e. Data required to accommodate Component-unique transaction requirements (example: C-series transactions). Data does not apply to DLSS transactions.
 4. This revision to the DLMS Supplement (DS) incorporates Approved DLMS Changes (ADCs) listed. ADCs are available from the DLMSO website: <http://www.dia.mil/g6/dlms/Changes>

511 Requisition Functional Group=RN

This Draft Standard for Trial Use contains the format and establishes the data contents of the Requisition Transaction Set (511) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to requisition needed material and equipment from a supply distribution system for immediate consumption or stockage against projected requirements. The originator can also use this transaction set to inquire about the status of, amend, or terminate the original requisition. This transaction set may be used to convey a description and quantity of the required material, delivery and billing information, and other logistics information necessary to evaluate and meet the material needs of the originator. This transaction set is not used to establish a contractual relationship between trading partners, and may precede the use of a purchase order.

- Notes:**
- 1/50L The LM loop identifies logistic data common to the entire transaction set.
 - 1/50 The LM loop identifies logistic data common to the entire transaction set.
 - 1/70L The N1 loop identifies name and or address information common to the entire transaction set.
 - 1/70 The N1 loop identifies name and or address information common to the entire transaction set.
 - 2/150L Each iteration of the QTY loop qualifies a portion of the total quantity ordered with particular logistics information codes.
 - 2/150 Each iteration of the QTY loop qualifies a portion of the total quantity ordered with particular logistics information codes.
 - 2/180L The N1 loop identifies the name and address information unique to each use of the LX loop.
 - 2/180 The N1 loop identifies the name and address information unique to each use of the LX loop.
 - 2/220L The REF loop conveys serial and lot number inventory data.
 - 2/220 The REF loop conveys serial and lot number inventory data.

- Federal Note:**
1. Organizations use this transaction set to order items of supply, to refer transactions to another supply source for processing, and to transmit misrouted transactions between supply sources.
 2. Use a single occurrence of this transaction set to transmit single or multiple requisitions to one or more supply sources.
 3. A single transaction set may contain a combination of requisitions for standard and nonstandard material.
 4. DoD logistics users should refer to the Defense Logistics Management System (DLMS) Supplement to the Federal Implementation Convention (IC) available at URL: <http://www.dia.mil/j-6/dlms>. The DLMS Supplement provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

- DLMS Note:**
1. Requisitions for material to be provided as Government Furnished Material (GFM) to commercial contractors, requisitions for excess government owned plant property, and requisitions from foreign governments for material to be provided in support of Security Assistance (SA) contain distinguishing requirements which do not apply to non-GFM or non-SA requisitions.

511 Requisition

Functional Group=RN

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Requisition Transaction Set (511) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to requisition needed material and equipment from a supply distribution system for immediate consumption or stockage against projected requirements. The originator can also use this transaction set to inquire about the status of, amend, or terminate the original requisition. This transaction set may be used to convey a description and quantity of the required material, delivery and billing information, and other logistics information necessary to evaluate and meet the material needs of the originator. This transaction set is not used to establish a contractual relationship between trading partners, and may precede the use of a purchase order.

Federal Note:

1. Originators use this transaction set to order items of supply, to refer transactions to another supply source for processing, and to transmit interrelated transactions between supply sources.
2. Use a single occurrence of this transaction set to transmit single or multiple requisitions to one or more supply sources.
3. A single transaction set may contain a combination of requisitions for standard and nonstandard material.
4. DoD logistics users should refer to the Defense Logistics Management System (DLMS) Supplement to the Federal Implementation Convention (IC) available at URL: <http://www.dla.mil/dlms>. The DLMS Supplement provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

DLMS Note:

1. Requisitions for material to be provided as Government Furnished Material (GFM) to commercial contractors, requisitions for excess government owned plant property, and requisitions from foreign governments for material to be provided in support of Security Assistance (SA) contain distinguishing requirements which do not apply to non-GFM or non-SA requisitions.
2. Users operating under the Defense Logistics Management System (DLMS) must reference the *Use of Issue and Purchase Unit Conversion Table*, *Transportation Mode of Shipment Conversion Table*, and the *Accounting Classification Appendix* which can be found on the Defense Logistics Management Standards Office (DLMSO) web site at www.dla.mil/dlms.
3. This DLMS Supplement to the Federal 511R implementation convention contains:
 - a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DLMSO prior to use.
 - b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - c. Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS-DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DLMSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.
 - d. Data elements which have an expanded field size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
 - e. Data required to accommodate Component-unique transaction requirements (example: C-series transactions). Date does not apply to DLSS transactions.
 - f. Data associated with a DLMS enhancement authorized for implementation by modernized systems under DLMS migration. This data (including expanded field sizes) should be adopted during, or subsequent to, modernization when applicable to the Component's business process. Prior coordination is not required. Components should ensure that inclusion of this data in a DLMS transaction does not cause inappropriate rejection of the transaction.
4. This transaction may be used to provide Unique Item Identifier (UII) information. Refer to the UII web at URL: <http://www.aeq.ced.mil/pep/UII/> for DoD policy and business rules.
5. This revises to the DLMS Supplement (DS) incorporate Proposed DLMS Change (PDC) and Approved DLMS Changes (ADCs) listed. PDCs and ADCs are available from the DLMSO website: <http://www.dla.mil/dlms/Changes>
 - ADC 45, Use of Both Ownership Code and Purpose Code in DLMS for Ammunition
 - ADC 56, Customer Identification on Automated Exception Requisitions
 - ADC 67, Identification of the Requisition Order/Referral Order Submitter on the DS 511R, Requisition
 - ADC 69, DLMS Mapping for Requisition Exception Date Transaction, DLA DI Code YRZ
 - ADC 85A, DLMS Mapping to XQDS 511M and 869F for Requisition Exception Date Transaction, DI Code YRZ
 - ADC 70, DLMS Mapping for DLA Directed MRO (Requisition), DI Code C04/C01 and DLA Directed MRO (Referral Order), DI Code
